

TELEMATICS

Remote monitoring keeps you in control

Monitor the location, status and deployment of your MOBILAIR compressors in real time.

MOBILAIR – Always in view

The integrated compressor controller determines and processes operating data, which it subsequently forwards to the Telematics system. Central monitoring and processing of operating messages is performed in the dashboard and enables the following remote functionality:

Operating data display

Collection and evaluation of operating data from MOBILAIR systems.

Messages and reports

Immediate notification of warnings or fault messages – both at the machine itself, by E-mail and via the portal. Overview of compressor health using preset threshold values.

GeoLeash

Pinpoints the exact location of the machine and defines its permitted operating area. If the machine leaves the designated area, a warning message is triggered.

System overview and detailed machine data

Efficient deployment of MOBILAIR compressors thanks to the comprehensive system overview. Access to reliable data for construction site accounting purposes.

Maintenance planning

Greater maintenance efficiency through early identification of maintenance requirements and timely initiation of the necessary measures.

GPS machine tracking

Global, round-the-clock GPS tracking of MOBILAIR compressors. Current GPS position and address data for each compressor displayed on a map.

Fleet management

Continuous monitoring of the fleet for maximum efficiency and utilisation. All data – such as fuel consumption and deployment frequency – always available at a glance via the KAESER portal, or via REST API or AEMP in your own system.

TELEMATICS app

The TELEMATICS app provides mobile access to the KAESER Telematics portal. Current operating and location data, warning messages, and a clear overview of your machines – available any time, anywhere.

TELEMATICS

Available for selected MOBILAIR models

TELEMATICS 24

System supplied with the necessary hardware at additional cost

FREE subscription period of 24 months

Full access to all Telematics portal functions

For all systems with SIGMA CONTROL MOBIL 2 and SIGMA CONTROL SMART

TELEMATICS 12

= 1-year extension

Chargeable subscription period of 12 months

Use of all Telematics portal functionality

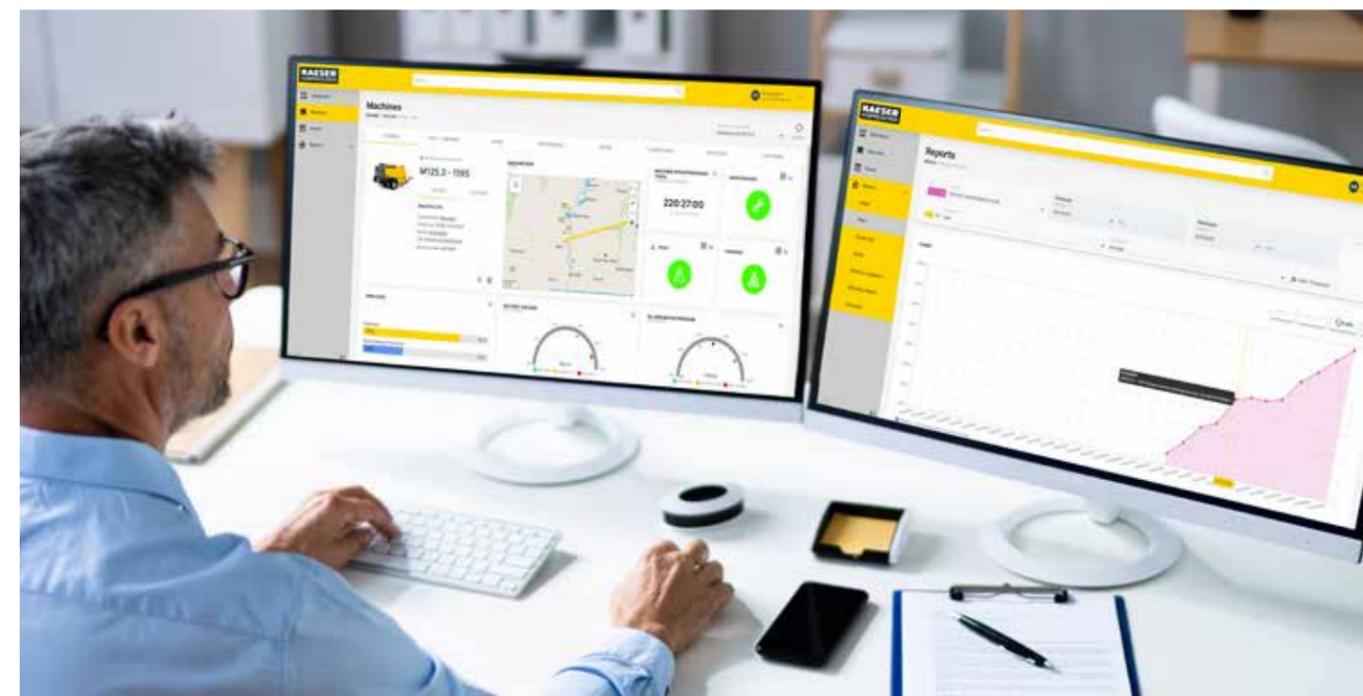

Prerequisites

- Order placed for a new system (retrofit not available)
- UMTS/GSM option selected (in the configuration)
- Data usage agreement signed

The KAESER advantage

By allowing your anonymised machine data to be analysed, you help make the operation and deployment of future systems even more efficient and even safer.

More compressed air for less energy

The world is our home

As one of the world's largest manufacturers of compressors, blowers and compressed air systems, KAESER KOMPRESSOREN is represented throughout the world by a comprehensive network of wholly owned subsidiaries and authorised distribution partners in over 140 countries.

By offering innovative, efficient and reliable products and services, KAESER KOMPRESSOREN's experienced consultants and engineers work in close partnership with customers to enhance their competitive edge and to develop progressive system concepts that continuously push the boundaries of performance and technology. Moreover, decades of knowledge and expertise from this industry-leading systems provider are made available to each and every customer via the KAESER group's advanced global IT network.

These advantages, coupled with KAESER's worldwide service organisation, ensure that every product operates at the peak of its performance at all times, providing optimal efficiency and maximum availability.
